The TD 100 handpiece features a replaceable O-ring that protects the contact area from flux fume and other contamination. The O-ring may need to be replaced over time. To replace the O-ring follow the procedure below:

1. Disconnect the TD 100 from the power source
2. Remove the tip cartridge
3. Unscrew the cap from the back of the TD 100
4. Slide the connector assembly out of the handle

5. Remove and replace the old O-ring from the connector assembly (Old "O-ring" may remain in handle)
6. Reinstall the connector assembly. Be sure to line up the keyways on the handle and connector assembly. Do not force the connector assembly into the handle.
7. Reinstall the cap and make sure it is fully seated against the handle
